## Weekend graveyard shift

Submitted by danps on Fri, 08/10/2012 - 11:59pm

Working on an old laptop tonight, and I looked through the bookmarks on the browser. It seems like sites come and go, eh? Here are three that I used to at least occasionally check in with, and they now appear to be well and truly dead:

- [Anonymous Liberal](#) [1]
- [At Largely](#) [2]
- [The Sanity Check](#) [3]

So which stones have your spades uncovered recently? (PS - makes me feel like a right graybeard going for 5 plus years at Pruning Shears.)
