Possible early morning site outage

Submitted by lambert on Tue, 01/20/2015 - 1:47am

UPDATE The upgrade is done! This should make your experience much more reliable.

In the continuing effort to figure out why the blankety-blank crashes all the time, my ISP is going to do some server upgrades. (One thing that happens is that we get hit with crawlers, and newer versions of the database will let us handle that better.)

So, stay tuned!
